

DESCRIPTION

The Cessna Caravan is a modern passenger/cargo aircraft operated on wheels and floats. Safe and reliable, it is very economical to operate, competing favorably with much larger aircraft on a cost per pound/passenger basis. With a full load of seven passengers, and 1000 lbs of baggage and cargo, it can still hold I.F.R. reserve fuel. The Caravan comes equipped with a large cargo door, commuter seating and turbine engine reliability. Executive seating is also available at the customer's request.

Engines

One Pratt and Whitney PT6A-114A turbine engine rated at 675 shaft-horsepower

Available Landing Gear

Wheels, Floats

Ice / Gravel Strips

Yes / Yes

Available Passenger Capacity

7

Cruise Speed

170 mph
