

DESCRIPTION

The Beech 1900D provides passengers with a full stand up pressurized cabin and high back leather seating with fold out tables similar to airliner seats with recline and armrest features. All seats on the 1900D are window or aisle seats maximizing in-flight comfort. The 1900D has a large cargo door and movable bulkhead to safely offer a combination load of cargo and passengers. This allows the passengers to be in a different section of the aircraft away from the cargo.

The 1900D is the most comfortable aircraft available for charter in the north. With a cabin over 50% larger in volume than its closest competitor, higher cruise speeds, longer range and efficient payload Air Tindi's 1900D is in a class of its own. Air Tindi is also pleased to offer the only in-flight entertainment in the north. Passengers will be able to play games, watch movies or listen to music while flying across the north and beyond.

Engines	Twin Engine, Turboprop
Available Landing Gear	Wheels
Gravel Strips	Yes
Available Passenger Capacity	19
Cruise Speed	345 mph
Cargo Door Size	52" x 52"
Max Payload	4,500 lbs / 652 cu ft
